

FUN FACTS ABOUT CHICKENS

Many chickens like to work for their food! In some studies, chickens have chosen to press a button for food instead of eating from a readily available food source. They often enjoy puzzle feeders!

PHEW!

Chickens have a sharp sense of smell and tend to avoid smelly garlic, but don't mind vanilla. Some scents have been shown to affect behavior. It's aromatherapy for chickens!

Chicks have demonstrated the ability to discern between smaller and larger numbers of objects, indicating an ability to count to a certain extent!

THAT ONE!

CLUCK

While it might just sound like a bunch of clucking to an unfamiliar observer, chicken "language" consists of at least 24 different vocalisations! That doesn't even include body language!
