

FUN FACTS ABOUT PIGS

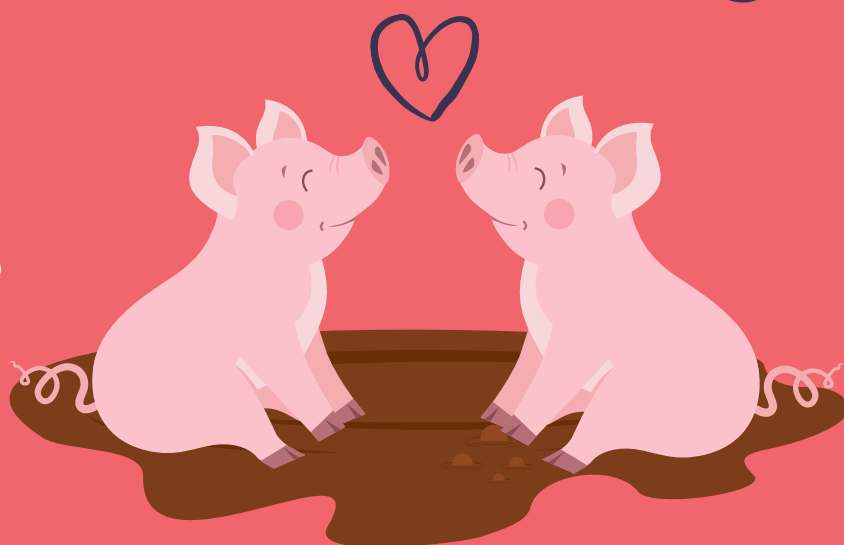

Pigs are able to use mirrors to find food hidden in a space that is only visible by looking in the mirror, indicating a concept of self recognition and understanding of their environment.

A mother can distinguish between the vocalisations of her piglets and other piglets. Pigs recognize each other's voices in other social relationships too!

Pigs are very social, developing strong bonds and prefer to spend time with certain individuals over others.

Studies have demonstrated that pigs appear to have a concept of the future and the ability to anticipate positive or negative events.
