

FUN FACTS ABOUT RABBITS

Did you know that rabbits sometimes “binky” or “dance” when they are really happy? It's true! A binky is when they jump into the air and twist around!

Rabbits can grind their teeth together creating a sound (called a purr by many) that often indicates positive emotions. However, if a rabbit is acting unwell or injured this may indicate pain so context is important!

Rabbits are quite clever and can learn to solve puzzles, allowing them to get to their desired treats!

Guess what isn't a regular part of a rabbit's diet? Carrots! While they can have and enjoy a small amount of carrots, too many carrots can cause health issues for our rabbit friends.
