

FUN FACTS ABOUT DONKEYS

A donkey's sense of hearing is so well developed they can hear the call of another donkey from miles away!

Howdy!

Unlike horses, donkeys evolved to survive desert environments and get up to 95% of their nutrients from a diet consisting of plants generally considered inedible.

Donkeys develop strong bonds, preferring to spend time with their chosen companions. Their bonds are so close that being separated can cause them to become extremely stressed, even ill!

Did you know there are Mini and Mammoth donkeys? the shortest donkey on record, stands at just over 2ft at their shoulders and the tallest donkey on record stands at 5ft 8in at their shoulders!
