

FUN FACTS ABOUT GOATS

Start with smiling! Goats are able to differentiate between happy and unhappy human faces. And they have been found to prefer happy faces!

Goats can understand where a treat has been hidden by watching where a human points, or the place they touch!

Did you know that goats can develop accents? Kids' voices change to sound more like the other goats they are with when kept in different social groups!

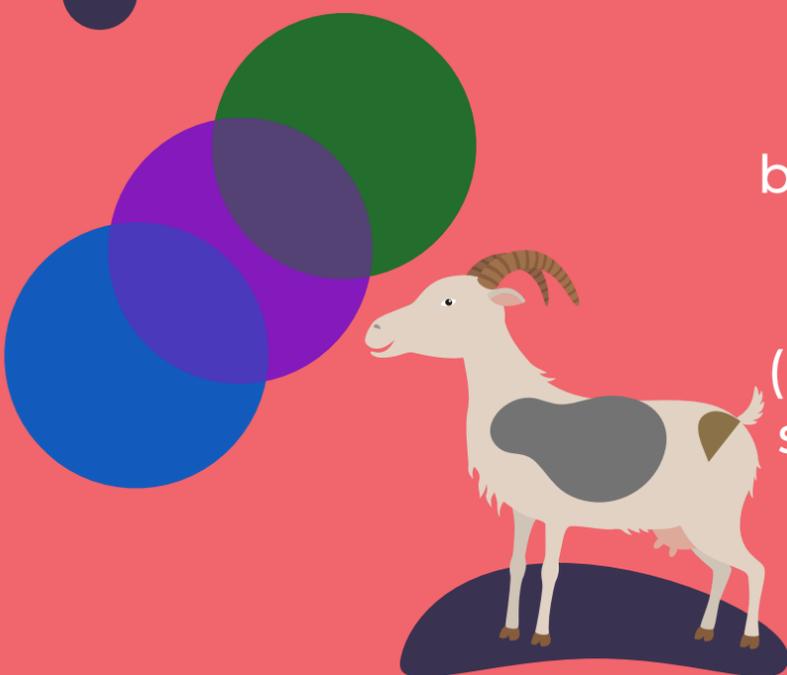

MEEEEAH!

MEHEHEH!

Goats see purples, blues, and greens best! They can also see oranges and yellows, but are dichromates (red-green colorblind), so can't distinguish as well between those colours.
